

An Infinite runner where a monster is chasing you. There are two states in the game one where you can see the environment the second where you can see the blocks and the enemies/obstacles. With the push of a button you will trigger which state is active.

The objective of the game is to survive as long as possible. Since the game is an infinite runner just try to go the farthest and get the highest score.

- Run away
- Find next platform
- Jump to next platform
- Dodge enemies/Hazzards
- Pick up blocks that are in opposite state of platforms
- Throw them at monster to slow it down

Its a continues runner .. I want to target friends that like to compete with each other to see who can get the highest score will still requiring memory and skill.

Some of the games i can think of is mario and castle crashers and mario world 2.
